Subject: Application for Python Backend Developer Position

Dear Hiring Manager,

I am writing to apply for the Python Backend Developer position at your organization. I am currently pursuing a B.Tech in Computer Engineering at Swarnim University and have completed my Diploma in Computer Engineering from Arpit Institute of Technology.

I have practical knowledge of Python, Django, Django REST Framework, REST APIs, MySQL, and Git/GitHub. I have also completed a Python Backend Developer course from TOPS Technologies and developed backend projects using Django and REST APIs.

As a fresher, I am looking for an opportunity where I can apply my technical skills, learn from experienced developers, and contribute to real-world projects. I am a quick learner and committed to continuously improving my backend development skills.

I would appreciate the opportunity to discuss how my skills and enthusiasm can contribute to your organization.

Thank you for considering my application.

Sincerely,

Parth Navapariya
